ABOUT ME

I am a passionate and self-motivated person, ready to accept the challenges with leadership quality and adaptability. I am always looking forward to my personal and professional growth.

EDUCATION

BUNDELKHAND INSTITUTE OF ENGINEERING AND TECHNOLOGY Jhansi, India

B.TECH In Computer Science

- CGPA: 7.98
- 2019-2023

ST. JOHN'S SCHOOL Varanasi, India

Intermediate

- Percentage: 75.4
- 2017-2018

WH SMITH MEMORIAL SCHOOL Varanasi, India

High-School

- Percentage: 87
- 2015-2016

PROJECTS

Pdf Management | *HTML, Golang, PostgreSQL*

- The PDF Management project is an innovative and robust Go-based system that enables secure registration, authentication, and efficient management of extensive PDF collections. It offers an intuitive interface with seamless pages for registration, login, PDF rendering, and customizable options. The system integrates a sophisticated PDF viewer for easy browsing, and each PDF is equipped with a unique shareable link.
- Github Link: [Pdf Management](#)

Notes-API | *HTML, Golang, PostgreSQL, Gin, GORM*

- I developed a secure Note Management System using Go and the Gin framework. The system incorporates JSON Web Token (JWT) authentication for user registration, login, and authorized data access. It includes CRUD operations for notes, validating users through hashed passwords and JWT tokens. This project underscores my adeptness in backend development, security implementation, RESTful API design, and database management.

Quiz-App | *Golang, Gin, PostgreSQL, VueJS*

- The Quiz App provides a dynamic quiz experience, allowing users to choose categories, answer questions, and receive immediate feedback. Developed with Go, Gin, and PostgreSQL, its frontend utilizes HTML, Bulma CSS, and Vue.js for interactivity, offering a seamless learning and testing environment.

TECHNICAL SKILLS

Courseworks: Data Structure and Algorithms, Database Management System, Operating System

Languages: C++, GoLang, HTML, Javascript, SQL, Python

Frameworks and Libraries: Gin, ExpressJS, NodeJS, Bootstrap

Tools and Utilities: Git, VSCode, PostMan, Docker, Redis
